

**Chiropractic Testimonial – by Joel Boatright
July 14, 2011**

What were your symptoms prior to becoming our patient?

I had really bad pain in my right hip. If I bent over or tried to lift anything, it was even worse. I was afraid I wouldn't be able to work ever again.

For how long?

4 months.

What other methods did you try before Chiropractic?

I saw several other doctors who only prescribed muscle relaxers and pain pills.

What were the results?

The pills did nothing.

When did you start Chiropractic care? Who recommended it to you?

March 2011. No one.

What is your current status?

I started seeing results within a couple of days. And with each treatment I got better – I am fine now.

What are some things that you can do now that you couldn't do before?

I really couldn't do anything before the treatment; even getting in and out of car really hurt. I couldn't work at all. Now, I can work and there isn't anything that I can't do.

Other information (Anything else you would like to say?)

I truly believe that without this treatment I would just be sitting at home in pain. I would have to give up my work (painting, repair, remodeling), also motorcycles, jet ski, four-wheelers, and hunting – I am very active.

Would you recommend Chiropractic to others?

Absolutely! These are the only doctors I know who are on time to meet your appointment! Every time. It is a wonderful atmosphere in the office and everyone is so friendly and nice. Just a great experience.
